Subject: Dimock Draft data summary -

Den (from all of us, Ann here on FC's computer) -

This table shows the highest concentrations of the contaminants based upon an incomplete data set (limited data set that we have received August and prior). We have data sets from September that we have seen that do not identify the wells and they contain elevated glycols, etc. There is much more data is being made available by Cabot that has not been evaluated. During our resident visits we became aware of even more available data that is being currently compiled into a data base.

Francisco J. Cruz
On-Scene Coordinator
Hazardous Site Cleanup Division
U.S. EPA Region 3
